GEOPATHIC STRESS

Many people don’t realize they are sleeping in a disturbed zone. Geopathic Stress relates to irregularities in the Earth’s magnetic field in many geographic locations that affect certain people’s health. When those tested are found to also have toxins and poisons such as parasites, anaerobic bacteria, fungus, viruses, or pesticides, their ability to ward off illness is greatly diminished. If your test results reflect health issues caused by natural underground sources, please read this entire document. There will also be suggestions to resolve this issue.

This document addresses two types of Geopathic stress:

1. **Underground Water**
2. **Grid Lines**

UNDERGROUND WATER

If you have underground water or a stream that runs underneath your bed or your favorite chair, either right under the object, or at a 45% angle, you will be subjected to Geomagnetic Stress. It may be 50 feet, 500 feet, or 5,000 feet underground or more.

Flowing water underground, which moves endlessly both day and night produces magnetic stress that can, over time, negatively affect people’s health. For example, streams flowing underground at a speed of more than 3 km/hr can create the following phenomena:

1. A positive vertical electric field is created above the stream.
2. There is also a DC-generated, magnetic field.
3. The river flow generates radio frequency (RF) in the MHz range.
4. Gamma rays from the cosmos are normally absorbed by sandy soil and dry earth. When encountering an underground stream or wet clay, the rays are reflected back up to us.
5. Gamma radiation from the earth is increased. The gamma rays have an ionizing effect, causing an increase in free radicals. Free radicals cause changes in cell structure.

During the night, when cancer cells are dividing, the defender White Blood Cell (WBC) is naturally less efficient. We all have cancer cells, but our immune system will normally destroy them. However, in the presence of an outside agent, such as Geopathic Stress, the cancer cells actually make a protective coating around themselves.

As a result, the WBC’s are ineffective in destroying the cancer cells during the 8-hour sleep cycle. The body's resistance drops to a third of normal during sleep. Most of diagnosed cancer patients are sleeping above an underground stream. And approximately half of them are found with additional
GRID LINES

Geopathic Stress manifests itself in many ways which cannot be physically seen with the naked eye. The Earth is an electromagnetic body, with its own electromagnetic grid pattern. The most important is called the First Global Grid, or Hartmann Grid or Net, comprised of parallel energy waves rising vertically from the ground.

Dr. Hartmann, a German doctor, describes them as alternatively positive and negative, running from north to south and from east to west. He found that they are 4 in (10 cm) wide and 38 yd (35m) apart in Switzerland. The distances differ from area to area.

The Hartmann Grid (North-South and East-West) covers the entire globe. It passes about 11 feet in Hawaii, about 15 feet in Alaska, and about 5 - 8 feet elsewhere depending on where you are.

There is another much tighter grid pattern called the Second or Curry Grid named after a Swiss doctor, Dr. Manfred Curry. He identified this as traveling from south-east to north-west and south-west to north-east, with energy waves about 10 ft (3m) apart and medically significant double lines 47 yd (50m) apart. The Curry Grid also covers the entire planet.

Grid Lines go positive one way and negative the other way. If there is a positive and negative Hartmann and Curry grid crossing where you sleep, you do not have a problem because they cancel each other out.

However, if the Hartmann and Curry grid is a “positive - positive” crossing or a “negative - negative” crossing, you have a problem.

How can I tell if I am affected by Geopathic Stress?
There are a number of clues which may suggest the presence of Geopathic Stress by its effect on both people and buildings.

1. You have an illness such as an autoimmune disease, chronic fatigue, or cancer.
2. You have any illness which does not clear up despite good treatment.
3. You have tried a number of different therapies without success.
4. You feel better when away from home. For instance, a condition may clear up or improve when away on holiday only to come back again when you return home.
5. You became ill shortly after moving to the house.
6. You live in a house which has never "felt right" or you instinctively dislike it.
7. You wake up feeling unrefreshed or feel worse in the mornings.

To find out how you can mail your a DNA sample to determine if your health is affected by geopathic stress, and how to neutralize geopathic interference, contact:
